CareFirst Community Health Plan Maryland

Formulary (Preferred Drug List)

04/01/2022

INTRODUCTION

We are pleased to provide the 2022 CareFirst BlueCross BlueShield Community Health Plan Maryland (CareFirst CHPMD) Formulary as a useful reference. This formulary can assist providers in selecting clinically appropriate and cost-effective products for their CareFirst CHPMD patients.

The document is reflective of current medical practices of the date on which CareFirst CHPMD completed its standard review.

The CareFirst CHPMD formulary is intended as a reference for drug therapy selection. It is not intended to be comprehensive in nature nor is it a substitute for the knowledge, expertise, skill, and judgment of the prescriber in his or her choice of prescription drugs. Specific drug selectionfor an individual patient rests solely with the prescriber.

The CareFirst CHPMD formulary is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable.

We assume no responsibility for the actions or omissions of any provider based upon reliance,in whole or in part, on the information contained herein. The provider should consult the drug manufacturer's product literature or standard drug references for more detailed information.

PREFACE

The formulary is organized by sections. Each section is divided by therapeutic drug class primarily defined by mechanism of action- how the drug produces an effect in the body.

Drugs represented in this formulary may have varying cost to the plan member based on the plan's benefit structure. Generic drugs typically are available at a lower member out-of-pocket cost while brand-name drugs will generally cost more than generics and have a higher member out-of-pocket cost. Generic drugs should be prescribed first-line as much as possible unless a patient has experienced an adverse effect and/or a lack of therapeutic outcome after using a sufficient dose for an appropriate period of time.

PHARMACY AND THERAPEUTICS (P&T) COMMITTEE

The CareFirst CHPMD Pharmacy and Therapeutics Committee ("P&T Committee") is an external advisory body of CareFirst CHPMD network physicians and pharmacists. These clinical professionals are utilized to determine the drugs to include on the formulary, providing insights

to the safety and clinical effectiveness of drug therapies. Voting members of the P&T Committee must disclose any financial relationship(s) and/or conflict(s) of interest with all pharmaceutical manufacturers and affiliations.

GENERIC SUBSTITUTION

Generic substitution is a pharmacy action whereby a generic version is dispensed rather than prescribed brand-name product. Drug listed in lowercase indicates generic availability. In most instances, when a generic drug of a brand-name drug is released into the market it is covered and the associated brand-name drug will become non-formulary or not covered. Drugs prescribed are subject to state specific regulations and rules regarding generic substitution and mandatory generic rules apply where appropriate.

Generic drugs are usually priced lower than their brand-name counterparts. Prescription generic drugs are:

- Approved by the U.S. Food and Drug Administration for safety and effectiveness and Are manufactured under the same strict standards that apply to brand-name drugs.
- Tested in humans to assure the generic is absorbed into the bloodstream in a similar rate and extent compared to the brand-name drug (bioequivalence). Generic drugs maybe different from the brand in size, color, and inactive ingredients, but this does not alter their effectiveness or ability to be absorbed just like the brand-name drug.
- Manufactured in the same strength and dosage form as the brand-name drugs. When

a generic drug is substituted for a brand-name drug, you can expect the generic to produce the same clinical effect and safety profile as the brand-name drug (therapeutic equivalence).

SPECIALTY PLAN DESIGN

Specialty Guideline Management (SGM)

SGM is our utilization management program that helps ensure appropriate utilization of specialty drugs based on currently accepted evidence-based medicine guidelines. The utilization management program is available for all therapeutic areas dispensed by our specialty pharmacies. SGM is designed to help ensure safety and efficacy while preventing off-guideline utilization. Drugs which may be included in the SGM program are identified in the formulary as “SP” for your reference.

Note: Specialty drugs can only be dispensed by the CVS Pharmacy® Specialty Services and select University of Maryland Medical System Pharmacies. Providers: please contact either CVS Pharmacy® Specialty Services, Call: **1-800-237-2767**, Fax: **1-800-323-2445** or University of Maryland Medical System(UMMS) Pharmacy Services, Call: **855-547-4276**, Fax: **410-684-3776**.
